

Northern Nevada Hopes

Northern Nevada HOPES is a nonprofit community health center in downtown Reno, NV that offers integrated medical care and wellness services. We welcome patients, wherever they are in life, and provide them with compassionate, high-quality healthcare.

For medically underserved populations, our team-based approach to care gives patients access to a range of comprehensive services, while our one-stop-shop healthcare model reduces barriers to care and increases the likelihood of maintaining long-term health.

We believe that addressing health involves more than medical care, which is why we also address social determinants of health.

Among these determinants is the relationship between financial well-being and positive health outcomes, which are undeniably linked.

In 2017, HOPES launched the Healthy Money Habits (HMH) program that aims to level the playing field for our patient population. It helps patients reach financial wellness by providing financial education, financial coaching, and additional services that help them set and achieve financial goals. The program is available to Northern Nevada HOPES patients and is free of charge.

We are not financial advisors or financial counselors, but we are dedicated to improving our patients' financial health, empowering our community, improving financial literacy, and decreasing stress due to financial issues. Financial health is part of overall health!
